FollowUsGPS is the world's first provider of a Pay-As-You-Go Low Cost GPS tracking solution.

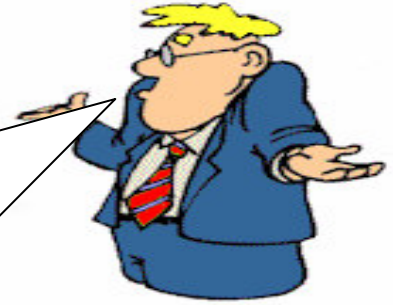

This means you decide how much you want to spend and when, with no long contracts or monthly payments from your bank.

You can choose from any of the PAYG tracking tariffs above which you may purchase on-line using a credit or debit card.

So to recap, you get a web based tracking console, world-wide mapping without high cost mapping licenses, GPS units that you can buy and don't require installation, and all with a selection of low cost Pay-As-You-Go tariffs, so no long term contracts...

Why wait any longer? Call us now on 0871 425 4422!

A Guide To When Our Service Deducts Your Tracking Credits.... And Why?

Add a new GPS tracker to your tracking console, and

5 location credits are deducted

Receive a location for your device, and

1 tracking credit is deducted

Make a live a location request for your device, and

2 tracking credit is deducted

Request a Zoomed map, and

0.2 of a tracking credit is deducted

Receive an automatic 'Status Email' with battery power level and present location

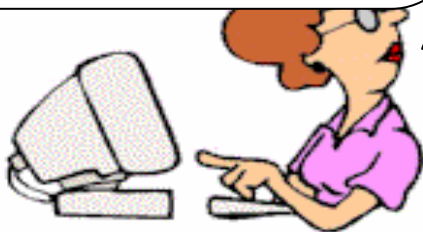

1 tracking credit is deducted

Sending 'over the air' configuration to change to your tracker set-up, and

5 tracking credits are deducted

Send an SMS from the tracking console to a mobile phone, and

1 tracking credit is deducted

Q. Why are 5 tracking credits deducted to add a GPS tracker to my account?

A. Because we need to send out command SMS messages to the GPS tracker, we have to pay for those text messages.

Q. Why am I charged 0.2 of a tracking credit when I zoom the map after making a location?

A. To ensure up-to-date global map information, each map is purchased from *multimap.co.uk* and there is a cost associated with this.

Q. Why do I have Status Email messages sent to me?

A. There are period emails sent to you and are very valuable. They let you know the location of the GPS device, see the status of the battery power and lets you know that all is well.

Q. Why am I charged 1 tracking credit to configure my GPS tracker 'over the air'?

A. Because we need to send out the configuration command by SMS message to the GPS tracker, we have to pay for the text messages.

Please note that a configuration change will not be knowledge by your GPS tracker until it carries out its next scheduled 'wake-up'. Until that point in time, it will be in sleep mode and will not know you have sent a configuration up-date. See the 'Set-Up PDF' for more guidance.
